-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Clemmons.

In particular, the Clemmons pump casing includes a fuel pressure sensor and a controller that uses the fuel pressure output to regulate the pressure of the pump. Of course, the casing also includes inlet and outlet lines (see Abstract).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Clemmons in view of Kenney.

Clemmons applies as noted above and Kenney teaches a very similar pump casing including a controller circuit. The controller includes a processor, an analog to digital converter and a PWM circuit. Depending upon whether or not the converter is viewed as part of the controller, the input from the controller may be viewed as either analog or binary.

It would have been obvious to modify Clemmons by using the details of the Kenney controller to drive the pump because these more specific details are simply not shown in Clemmons and the pump speed control is proportional to the fuel pressure control in the two devices.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
